

CLAIMS

What is claimed is:

- 1 1. A method for processed product supply chain reporting, comprising:
 - 2 a) receiving data from a plurality of stores of a supply chain utilizing a network, the
 - 3 data including first information relating to an amount of processed product
 - 4 distributed to the stores and second information relating to the sale of finished
 - 5 product by the stores;
 - 6 b) sending the data from the stores to a supply chain manager utilizing the network;
 - 7 and
 - 8 c) determining a percentage of cost attributable to the processed product using the
 - 9 first information and the second information for use at the supply chain manager.
 - 1 2. The method of claim 1, wherein the stores include restaurants.
 - 1 3. The method of claim 2, wherein the processed product includes food.
 - 1 4. The method of claim 1, wherein the first information includes an amount of the
 - 2 finished product.
 - 1 5. The method of claim 1, wherein the second information includes an amount of the
 - 2 processed product.
 - 1 6. The method of claim 1, wherein the percentage is made available utilizing a
 - 2 network-based interface.
 - 1 7. A system for processed product supply chain reporting, comprising:
 - 2 a) logic for receiving data from a plurality of stores of a supply chain utilizing a
 - 3 network, the data including first information relating to an amount of processed

product distributed to the stores and second information relating to the sale of finished product by the stores;

b) logic for sending the data from the stores to a supply chain manager utilizing the network; and

c) logic for determining a percentage of cost attributable to the processed product using the first information and the second information for use at the supply chain manager.

8. The system of claim 7, wherein the stores include restaurants.

9. The system of claim 9, wherein the processed product includes food.

10. The system of claim 7, wherein the first information includes an amount of the finished product.

11. The system of claim 7, wherein the second information includes an amount of the processed product.

12. The system of claim 7, wherein the percentage is made available utilizing a network-based interface.

13. A computer program product for processed product supply chain reporting, comprising:

- a) computer code for receiving data from a plurality of stores of a supply chain utilizing a network, the data including first information relating to an amount of processed product distributed to the stores and second information relating to the sale of finished product by the stores;
- b) computer code for sending the data from the stores to a supply chain manager utilizing the network; and

- 9 c) computer code for determining a percentage of cost attributable to the processed
 10 product using the first information and the second information for use at the
 11 supply chain manager.
- 1 14. The computer program product of claim 13, wherein the stores include
 2 restaurants.
- 1 15. The computer program product of claim 14, wherein the processed product
 2 includes food.
- 1 16. The computer program product of claim 13, wherein the first information includes
 2 an amount of the finished product.
- 1 17. The computer program product of claim 13, wherein the second information
 2 includes an amount of the processed product.
- 1 18. The computer program product of claim 13, wherein the percentage is made
 2 available utilizing a network-based interface.
